

Questions organized as themes:

33 features are grouped into 5 themes.

Awareness: QA_1, QA_2, QA_3, QA_4, QA_5, QA_6

Comprehension: QC_1, QC_2, QC_3, QC_4, QC_5, QC_6, QC_7, QC_8

Privacy Behaviours: QPB_1, QPB_2, QPB_3

Comfort: QCT_1, QCT_2, QCT_3, QCT_4, QCT_5, QCT_6, QCT_7, QCT_8, QCT_9

Preferences: QP_1, QP_2, QP_3, QP_4, QP_5, QP_6, QP_7

Awareness:

QA_1 I am aware that there is a privacy policy associated with the IoT device which collects personal data.

QA_2 I am aware that the primary purpose of a privacy policy is to inform users how a company collects, uses, and shares their personal data.

Comprehension

QC_1 It is easy to understand what personal data is collected.

QC_2 It is easy to understand how personal data is used.

QC_3 I understand the specific time or duration for which my personal data will be retained or stored.

QC_4 I can clearly identify which types of data mentioned are considered personal data.

QC_5 I find it easy to understand the purpose for which my personal data are collected and processed.

QC_6 I can clearly identify which types of data mentioned are considered sensitive data.

QC_7 I find it easy to understand the purpose for which my sensitive data are collected and processed.

QC_8 I can clearly understand with whom my personal and sensitive data are shared (such as third-parties, business partners).

QA_3 I am aware of the opt-out option in privacy policies.

QA_4 I am aware of the privacy by default option in privacy policies.

QA_5 I am aware of the privacy choices available to me in the IoT devices I use.

QP_1 I would be interested in receiving personalized recommendations for privacy choices based on my privacy preferences.

QA_6 I am aware that I have the right to access for my personal data.

QP_2 I am aware that I have the right to access, and I have used this right to request information from organization(s).

QP_3 I was not aware of my right to access before, but now I am interested in learning how to use this right.

Privacy Behaviours/ Previous actions Chose a better name later

#QPB_1 I often click 'I agree' or 'OK' or 'I Consent' to accept privacy policies without reading them thoroughly.

#QP_4 I would be willing to pay a premium price for an IoT device that offers stronger privacy protections, such as minimal data collection and local data processing.

#QPB_2 I have stopped using an IoT device due to concerns about its privacy practices

#QPB_3 I have chosen not to purchase an IoT device due to privacy concerns.

Comfort

QCT_1 I am comfortable with IoT devices collecting and using my personal data for targeted advertisement.

QCT_2 I am comfortable with IoT devices collecting and using my personal data for personalized content. Example include, personalized news, music, TV shows, movies, or social media feeds.

QCT_3 I am comfortable with IoT devices collecting and using my personal data for sharing it with the device manufacturer.

QCT_4 I am comfortable with IoT devices collecting my personal data and sharing it with third-parties, such as advertising partners, data brokers, or other service partners.

QCT_5 I am comfortable with IoT devices collecting and using my personal data for sharing it with government agencies, such as for law enforcement or other public interest.

QCT_6 I am comfortable with IoT devices collecting and using my personal data to improve services and develop new features.

QCT_7 I am concerned about my lack of control over my personal data collected by IoT devices.

QCT_8 I am concerned about my lack of control when information collected by my IoT devices is combined with data about me from other sources (such as, social media, online purchases, public records).

QCT_9 I am concerned about my lack of control over how (artificial intelligence) AI systems process, analyze, and make decisions using my personal data.

Preference

QP_5 How do you feel about the trade-off between privacy and functionality in IoT devices? (Select one)

- a. I strongly prefer privacy, even if it reduces functionality
- b. I somewhat prefer privacy over functionality
- c. I prefer a balance between privacy and functionality
- d. I somewhat prefer functionality over privacy
- e. I strongly prefer functionality, even if it reduces privacy

QP_6 I would prefer to have privacy by default settings enabled for personal data in IoT devices.

QP_7 I would prefer to have privacy by default settings enabled for sensitive data in IoT devices.
